

Nationwide Natural and Built Environment Solutions

AIS is a full service environmental management company with over 75 years of experience. We provide environmental engineering solutions including environmental controls implementation, environmental assessments, site surveys and remediation activities. AIS has extensive experience in remediation services including lead, asbestos and mold abatement, remediation of contaminated properties and site restoration projects with considerations to sensitive environments and restricted sites. AIS is considered one of the leading industry experts of environmental regulation and waste management as it pertains to waste and bi-products generated through waste processing, demilitarization, demolition, industrial processes, remediation and industrial cleaning. The firm operates a non-hazardous TSD and transportation fleet in the Midwest, giving AIS a competitive advantage throughout CONUS as it relates to waste stream treatment technologies and innovative disposal methods.

Core Competencies and Capabilities

- Environmental Assessments and Impact Surveys
- Abatement and Remediation Services
- Demolition and Site Preparation
- Decommissioning and Decontamination Services
- Industrial Services and Cleaning
- Waste Management Services
- Chemical Management
- Facility Management Services
- Training and Safety

Safety and Experience

Key project managers, field technicians, drivers and laborers are trained in:

- Hazardous Waste Management
- Emergency Spill Response

- Confined-Space Entry
- OSHA 10/30
- HAZWOPER 24/40
- CPR/First Aid
- Internal Safety Requirements

Associations

Team members maintain active roles in the development and advancement of industry and government initiatives through participation in key organizations.

- National Demolition Association
- Society of American Military Engineers
- National Defense Industrial Association
- National Association of Environmental Professionals
- National Association of Environmental Managers
- National Explosive Ordnance Disposal Association

Insurance and Bonding

AIS has the capacity to perform large short-term and long-term projects throughout CONUS, with responsiveness and responsibility.

- Single Project Bonding Capacity | \$5 Million
- Aggregate Bonding Capacity | \$15 Million
- General Liability | \$11 Million
- Auto Liability | \$11 Million
- Pollution | \$11 Million
- EMR | 0.85

Key Past Performance

Pueblo Chemical Agent Destruction Pilot Plant (PCAPP)

Service and management of bi-product waste streams.

United States Air Force Academy

Asbestos abatement and remediation services.

McClouth Steel Pond Remediation

Removal, transportation and disposal of 4.7M gallons of contaminated waste.

Base Elizabeth City Environmental Services

Oil water separators, sump cleaning, analysis and waste disposal service.

White Sands Missile Range Training

Environmental safety and regulation course administration and facilitation.

Army Arsenal Bunker Demolition

Remediation and demolition of former Army munitions bunkers.

Waste Water Treatment Plant Management

Analytical testing, characterization, transportation and disposal services.

Wixom Assembly Plant Demolition

Deactivation, demolition and remediation of 4.7M sq. ft. of factory and 240+ acres of land.

Plan Decommissioning and Demolition

Safety, consulting and decontamination/abatement services at the former General Motors Willow Run Plant.
